8. If any equipment had any issues, please describe.

The expander tray does not work. We are working with Dan Shadakovsky, purchasing and Dell to get a new one or get this one fixed.

1 (14%)

haven't opened the boxes yet

1 (14%)

The 600 sheet output expander had a code of RK462- not 600SHT.  
everything else looked okay

1 (14%)

Regarding the following question, one printer has been installed and one has not been installed.

1 (14%)

The output expander tray is RK462, not 600 SHT. The high capacity feeder is 5330 dn 2100 (FM056).  
The boxes are in good condition but I have not had time to open them so at this point I am not saying they are in good condition.

1 (14%)

The printers have not been unpacked and installed and I don't have that option in the previous required field. I will let you know if there are any problems.

1 (14%)

The box came with a hole in it from FedEx, but seems to not have damaged the printer. Will know more when we get it installed.
