1. Does your county use the NAICS Codes?

Yes

7 (35%)

No

13 (65%)

Total: 20

2. If you answered Yes to the last question, please describe what you use the data for.

They are utilized in the BA Code in Personal Property. We use 4 characters. I will send DOR the reference document I developed for use in this office. The highlighted codes are those identified in DOR Chapter 12 as industrial and must have an industrial abstract code. We also use the BA code to identify like business in order to estimate a value for non reporters. Since the abstract code for all commercial personal property is 29900, the BA code is the only way to identify these. I do not believe assessors should be required to use the BA code, but the field should continue to be available. It was a large project for this office to update them and is now a great tool.

1 (10%)

We use them on the personal property tab to help categorize the personal property. Have generated reports but not critical to us.

1 (10%)

We use them for on personal property and tie them back to the abstract code. when new business come in with same NAICS codes and no value we look at established businesses with same NAICS codes

1 (10%)

Leave the data for counties currently using this field.

1 (10%)

We use it for finding specific type businesses for personal property

1 (10%)

It is used to identify and classify PP and IP and has been a huge project to put these on.

1 (10%)

using the abstract codes the NAICS fields could be completed.

1 (10%)

I wouldn't object to it being removed but I don't object to it staying either, I think if some counties use it and want it leave it.

1 (10%)

If there are counties using these codes, they should be left. The state should not destroy a counties work.

1 (10%)

A Lot of our companies report this code to us. I thought this was to be a reporting tool for the Legislature or SBOE. We spent hours putting this in. I don't want my data automatically deleted. We may use them in the future.

1 (10%)

Total: 10

3. Would you object to having this data removed?

No, remove the data

4 (20%)

Yes, leave the data

16 (80%)

Total: 20
