Survey Name: Security Change Request for Public User

Survey Description: The Department has received several requests for a security access change for the Public User. Currently, all public users can select any table in RealWare, except those that contain sales information or data that would be provided by the taxpayer (e.g. data contained on a declaration). A few counties are now requesting that access to certain data fields within the sales file be granted to the Public User as well. These fields are contained in the TBLSALES table include the fields: ACCOUNTNO, BOOK, DEEDTYPE, PAGE, SALEDT, RECPTNO, VERSTART and VEREND. This survey is scheduled to close on Friday, October 7, 2011.

## 1. Should the Department provide access to fields described in this survey in the TBLSALES to all Public User accounts?

Yes, provide the access on the columns specified.

13 (72%)

No, access to the TBLSALES table should be restricted.

0 (0%)

Access should be granted, but to different fields.

5 (28%)

---

Total: 18

## 2. If you indicated that access should be granted, but to different fields, please describe....

Those fields should suffice for our purposes. But maybe everyone's needs could be easier met if you just allowed access to everything except sales price. AccountNo would obviously need to be pulled from TblSalesAcct as opposed to TblSales. Thanks

1 (20%)

We need DOCDT as well as those listed. I agree that access to all fields excluding SALP , ADJSALEP and TMADJSALEP would be the best solution. I would like read only access to the entire table back until this issue is resolved.

1 (20%)

If you're going to give access to that then I would support that all info with exception of sale prices, adjusted etc., be granted.

1 (20%)

Please grant access to all fields except sales price.

1 (20%)

Give access to all fields with the exception of the sales amount, adjusted sales amount and timeadjusted sales amount.

1 (20%)

---

Survey Name: UW Department of Agricultural and Applied Economics Data Request

Survey Description: The University of Wyoming Department of Agricultural and Applied Economics is requesting data for economic analysis. According to Scott Lieske "The University of Wyoming Department of Agricultural and Applied Economics recently received funding from the United States Department of Agriculture (USDA), National Institute of Food and Agriculture (NIFA) for a project entitled, "Determining The Relationship Between Development Pattern And The Costs Of Public Services In The Mountain West." The study is looking at how changing development patterns affect county expenditures for public services. In this initial round of funding we are looking at county government services in Colorado, Montana and Wyoming." They are requesting information on Parcel identification number, Account Type, Year Built, Building Value, Land Value, Total Value and Assessed Value. The contact person is Scott Lieske , Geospatial Extension Specialist in Community Planning, 307-766-3709. This survey is scheduled to close on Friday, September 30, 2011.
