***WO #:** WYDOR009
Budget: Customization
Scope: Add ability to move or copy well information and equipment to another account
Estimated Release November 2005
Estimate of Hours: 75 hours
Specifications:

System Changes

The Oil and Gas system will be enhanced so that maintenance of the wells and equipment associated with those wells will be more automatic.

1. A new button will be added to the top of the Oil and Gas Summary screen. This button will be the "Well Maintenance" button.
2. When the user pushes this button the Copy/Move Wells form will pop up. The user will have a text box where he can list the Account number that he wants to Move or copy the wells "From" and another text box that will list the account number that the user wants to copy or move the well information "To".
3. Once the "From" account number is entered a listing of all of the wells on that account will be presented in a list box. The user will be able to highlight one or more of the wells.
4. Once highlighted the user will push either the move or copy button. If the user pushes the "Move" button then the Well will be deleted (verended) off of the "From" account and will be added to the "To" account.
5. All of the Equipment in tblAcctOGDetail and/or tblAcctOgEquip with the same exact well name as the well being moved or copied will also be moved or copied onto the "To" account.

Please sign below to confirm your agreement of the above.
