

Work Order Quote

To: State of Wyoming
Today's Date: April 20, 2005
***WO #:** WYDOR012
Budget: Customization
Scope: Special Districts
Estimated Release December 2005
Estimate of Hours: 60 hours
Specifications:

System Changes

1. Special Districts that are calculated using a mill levy will be handled using the taxing authority definitions already existing in the RealWare system.
2. The RealWare system will be enhanced to handle special district assessments that are done in ways other than mill levy.
3. Currently the user can define Dollar or percentage type adjustments. The system will be enhanced so that the user is able to define a "DolPerUnit" type of adjustment. The new type of adjustment will have a calculation type of "DolPerUnit". The AdjustmentAmt will be the dollar per value for the adjustment.
4. Account Adjustments will be enhanced so that the user can input the number of units that he or she wants to have used in the calculation of the DolPerUnit account adjustment.
5. Account adjustments will be enhanced so that it has "Value Measure" associated with it. This will be driven by a look up table where the customer can define the type of value measures that will be used in account adjustments. This will be separate from the regular value measure look up table because the value measures used in account adjustments are not the same.
6. Once the user selects an account adjustment that is a "DolPerUnit adjustment and then enters the value measure and the number of units, the system will calculate the resulting value of the adjustment. This value will be saved in the override value field for the account adjustment. The override flag will be set to true. The user will have the option to alter the value of the calculated adjustment.
