#### Ticket Description

Problem Type: Enhancement

Software Version:

Service Release:

Application: RealWare

Sub-application: Declarations

Severity Level:

Extent of Occurrence:

Account#/Example:

Summary: We need to be able to put Parameters in.

Details: We need to be able to put parameters in for declarations, NOV's, etc... This is especially important if you have to restart a print job. Right now you have to reprint the whole job. Feel free to give me a call if you have any questions.

Thanks, Pat 307-527-8655

1/23/2007 4:41 PM MDT Posted Comment Nora Priegel Pat. Unfortunately the work order for another jurisdiction is not going to work for Wyoming. Please submit your request to DOR for an amendment to the existing work order. Sorry, I really thought we could get this done at the same time.

Nora

1/23/2007 4:24 PM MDT Posted Comment Nora Priegel Pat, I have requested to add your request to the work order that is in progress.. I will let you know when I hear back.

12/14/2006 11:27 AM MDT Provided Info Pat Meyer Nora,

The main Parameter would be to sort by alpha. If we wanted just one company an example would be this:

MARATHON OIL COMPANY MARATHON OIL COMPANY

We used to have to put this sign ~ between words for this to work. It would also be nice to be able to sort by parcel # not account #. We have different kinds of companies grouped in our 14 digit parcel # For example all of our oil and gas equipment is in this Parcel range 66133000000001 66133000009999.

Pat

12/11/2006 4:09 PM MDT Posted Comment Nora Priegel I agree and we are putting together a work order for another jurisdiction as we speak. It would be good if you can give us some request of what you would like to see,

Nora

Enhancement: This has continued to be an issue, however, CCI indicated a couple of weeks ago that it can presently be done. Maybe we can get some clarification on this.

One possible solution for those of you that have an Adobe PDF writer, write the whole report to PDF. You would then have a complete historical copy of the reports and you could print any page you wish whenever you want.

The DOR did not purchase these PDF writers for everyone. However, being able to store an exact copy indefinitely might have some real advantages.
