

Work Order Quote

To: Wyoming DOR for Sheridan County

Today's Date: September 6, 2005

WO #: **WYDOR019**

Scope: External file formats

Estimate of Cost: 0 hours, unless we will convert from the Handel format.

Projected Delivery:* September 16, 2005 – Final Download for Sheridan County

Specifications: Sheridan County indicated that they have some data external to the legacy WYS state system. The data CCI received from Sheridan was in the Handel format in an Access database. Handel format is not the Wyoming Conversation Standard's specified format. Also, Sheridan County indicated that their subdivisions were also external. Subdivisions were amended into the Conversion Standard document for WYS counties from the legacy system. Nothing was amended into the Conversion Standard if the data resides external to the legacy data.

Test data downloads were due by August 30th. The final conversion data is due September 16, 2005 in Conversion Standard format. If data is not in specified format, no conversion will be done on the data.

Corrective Action: Notified the DOR that data for Sheridan's external data is not the correct format specified in the Conversion Database. If the data will be converted, the data must be in the correct format. If CCI will convert from the Handel tables, this would be outside of the scope and a new work order would have to be drafted.
