1. Do you give the DOR permission to release this information to FIS Data Services.

Yes

Total: 23

2. Are there any specific limitations to the data that are required before the data is release?

We do not make 2008 values available in a digital format until September 1st. That is after mill levies are set and tax roll goes to the treasurer. We do not want to take the risk of erroneous information being in the publics hands. We have a form and information release that the company would need to sign. I would be happy to work with them directly.

We do not realse this information publicly yet. And when we do, it will be with taxes, after mill levies are set. I would prefer to work with any company requesting information on an individual basis by me personally at this time.

1 (14%)

At this point only 2007 data is available. 2008 file is a working file and the information changes every day. 2008 data can be released after August.

Yes, we have to complete it first. I would want a disclaimer on all of the information that goes out for Crook County. You know how easy it is to access when it's put out there on the computers.

1 (14%)

After the Mill levies are set. You can give this info. out.

3. If FIS Data Services requests a yearly download of this information, does the DOR have your permission to release the data without recontacting you first?

Yes

2 (9%)

No

21 (91%)

Total: 23

4. Do you have any other comments regarding this data request?

We still some cleanup from the conversion, until I am satisfied that all conversion issues are cleaned up, I will not be making data available to the public.

1 (20%)

What does the DOR charge for this service?

1 (20%)

I currently do not give our data to any company requesting it for their own purposes. I look at them one at a time. If our data is used to solicit business we do not supply it, period.

1 (20%)

We are still in the clean-up stage from conversion. Once this is complete, we will be putting our information on the internet for the public.

1 (20%)

I would like to see an actual list of the entities requesting the files and their intended use.
