

Survey Name: State Lands Parcel Layer Request

Survey Description: The Wyoming State Lands Office is requesting parcel information from each of the counties where available. They would like to see contact information for who owns the parcel as well. This information would be for internal research purposes only to help identify property owners around state land and the data would not be redistributed. If approved, this information would be disseminated from the data gathered by the DOR a few months ago. This survey will close on Wednesday, May 6, 2009.

Time Created: 4/21/09 2:15 PM

County	The requesting party is asking for GIS data to include ownership contact information. No sales information will be provided and the data will not be redistributed. Is this acceptable?	If you selected "With Conditions" from the previous question, please explain.	Do you approve the distribution of this data to the State Land Office?
